

## NEWMEDICA BRIGHOUSE COURT – SET TO OPEN JANUARY 2021

Exciting news from Newmedica Gloucestershire, brand new surgical centre – Brighouse – is set to open in January 2021 and transform eye care in Gloucestershire.

Brighouse joins existing clinics in Aspen Medical Centre (Gloucester) and Swindon, to allow Newmedica to see an added 5000 patients in Gloucestershire and surrounding areas every year. Patients will be able to enjoy shorter wait times and high-quality treatment with the centre boasting up to date technology.

Newmedica Gloucestershire are committed to providing short waiting times, innovative patient pathways (e.g., pre-op OCT for all cataract patients), telemedicine services and easy access to our consultants if you have clinical queries.

The new clinic is located in Barnwood with easy access to the M5, allowing patients from surrounding areas to access the centre. Speaking about the new build, Operations Director, Carl Hall said: “We’re excited to be opening another centre in Gloucester, it will allow us to see even more patients, and contribute to our mission to provide exceptional eye care to our community”

The state-of-the-art eye clinic and theatre complex is spread out across three levels, each suited to providing the best possible patient care. It is set to provide NHS and Private cataract surgery as well as a whole range of other ophthalmology services.

Led by some of Gloucestershire’s top consultants, Mr. Nigel Kirkpatrick, Mr. Adam Ross and Mr. Fadi Alkherdahji, it’s safe to say Brighouse is a significant step forward for eye care in this area.
